## RICCO BS

Phenolic resin based synthetic tanen

### PHYSICAL PROPERTIES

|                    |                                        |
|--------------------|----------------------------------------|
| Physical State     | : Powder                               |
| Appearance         | : White creamy coloured powder         |
| Chemical Structure | : Phenolic resin based synthetic tanen |
| Ionic Structure    | : Anionic                              |
| pH                 | : 3,00 – 5,00 (5% in water)            |
| Solid Content      | : Min. 95,00 % @ 105 °C                |

### GENERAL

- **RICCO BS** is a phenolic resin based synthetic syntan.
- **RICCO BS** can be used in the retannage of all types of leather before or after neutralization. However, softer leathers are produced when it's used before neutralization.
- **RICCO BS** eliminates the shrinkage and cracks on the grain, when used with vegetable tannins.
- **RICCO BS**'s light fastness is very high.
- **RICCO BS** has a good dispersing effect on dyes and tannins.
- When used in the production of suede leather **RICCO BS** provides excellent buffing fastness.
- **RICCO BS** is a syntan which gives very soft leather when used before neutralization.

### APPLICATION

For the soft and full leather articles RICCO BS is recommended to use between % 1 to % 10.

### PACKAGING

25 kg kraft bag.

### STORAGE

Keep containers tightly closed in a dry, cool and well-ventilated area. Shelf life is 2 years under conditions of normal use.

### HEALTH – SAFETY

Refer to safety data sheet for health and safety informations.
