GENERAL PROPERTIES

RICCO F-57 is a typical fatliquor to be used in chrome tanning and as auxiliary for penetration in any fatliquoring composition. The use of **RICCO F-57** results in excellent softness and silky feel. The fatliquor shows a very good stability to electrolytes and hard water and is non-oxidizing.

RICCO F-57 has high dispersing power on natural fats and this makes it suitable for using in any stage of leather processing and as component for any fatliquor formulation.

RICCO F-57 is compatible with anionic and nonionic products can be added directly to the drum. **RICCO F-57** significantly improves tear-resistance properties of the leather.
