## ***RICCO DD***

Dicyandiamid based synthetic tannin

### **PHYSICAL PROPERTIES**

|                           |                                      |
|---------------------------|--------------------------------------|
| <b>Physical State</b>     | : Powder                             |
| <b>Appearance</b>         | : Light Brown coloured powder        |
| <b>Chemical Structure</b> | : Dicyandiamid based synthetic tanen |
| <b>Ionic Structure</b>    | : Anionic                            |
| <b>pH</b>                 | : 9,00 – 11,00 (10% in water)        |
| <b>Dry Matter</b>         | : Min. 92,00 % @ 105 °C              |

### **GENERAL**

- **RICCO DD** can be used for all kind of leathers.
- **RICCO DD** is a retanning resin with excellent selective filling properties for the loose areas in the leather, resulting in uniform closed flanks and firmness.
- **RICCO DD** can be used on its own or in combination with vegetable extracts on chrome tanned leathers bovine leathers to improve the firmness of the grain and ability to be buffed.
- The resulting articles show little elasticity, fine grain structure and uniform firmness throughout the area.
- **RICCO DD** can be also used for production of water resistant leather.

**APPLICATION**

For cow shoe upper leathers;

**Retanning/Dyeing:**
